No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1989 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Announcement 440

Author Index for Volume 31 442

NOTICE

The Subject Index for Volume 31 will appear in the November 1989 issue as part of a cummulative index for the year 1989.

QUATERNARY RESEARCH

An Interdisciplinary Journal

EDITORIAL POLICY

Quaternary Research is devoted to *interdisciplinary* articles dealing with the Quaternary Period. Editorial policy requires that articles must be of broad interest, of basic significance to more than one discipline, and constitute a significant contribution to knowledge. Previously unpublished research results, comprehensive reviews of syntheses of a field of knowledge, and occasional English translations of outstanding articles in other languages will all be considered.

Four categories of manuscripts will be considered for publication. *Articles* may not exceed 5000 words, or approximately 20 double-spaced typewritten pages, including tables and references. Exceptions to this rule are rarely made. *Short Papers* should not exceed 1500 words and should include no more than two figures; such contributions will normally be published more rapidly than full-length articles. *Letters to the Editor* will also be considered. If dealing with a paper previously published in *Quaternary Research* the author(s) of that paper will be given the opportunity of drafting a reply. Normally both the Letter to the Editor and the Reply will be published in the same issue. *Book Reviews* will be published only if solicited by the Book Review Editor and only after critical review by the Editors.

Manuscripts submitted to *Quaternary Research* that do not meet the length requirements of the journal will be returned to the author(s) for appropriate revision.

All manuscripts will be reviewed by at least two referees. Articles and Short Papers are evaluated as to whether they are interdisciplinary in content and of broad interdisciplinary interest, scientifically sound, and present evidence that is sufficient to support the conclusions. They are also evaluated for organization, clarity, and conciseness. The Editors' decision is sent to the author(s) together with the referees' comments and evaluations as soon as the file is complete.

Three copies of the manuscript, including legible copies of all figures, should be submitted to:

Quaternary Research Editorial Office
Quaternary Research Center (AK-60)
University of Washington
Seattle, Washington 98195

Manuscripts are accepted for review with the understanding that the same work or closely similar work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out: further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Quaternary Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the University of Washington. The University will not refuse any reasonable request by the author(s) for permission to reproduce any contributions to the journal.

INSTRUCTIONS TO AUTHORS

General instructions. Manuscripts should be written in clear and concise English and should conform to the general style of the journal and the specific instructions listed below. Manuscripts that are not adequately prepared will be returned to the authors, since it is not feasible for the Editors to revise or rewrite manuscripts. Contributors, particularly those unfamiliar with English usage, are encouraged to seek the help of colleagues in the preparation and review of manuscripts prior to submission. This practice reduces the time required for review and avoids delays in publication.

Form and style. Manuscripts should be concise, but detailed enough to permit critical appraisal. They should be typewritten and double-spaced *throughout* (including references, tables, figure legends, and footnotes) on one side of approximately 22 × 28 cm (8.5 × 11 in.) paper with 2.5-cm (1-in.) margins. If composed on a word processor, a letter-quality dot-matrix or daisy-wheel printer should be used. Tables and figure legends should be typed separately and placed at the end of the manuscript. All pages, beginning with the title page and including tables and figure legends, should be numbered consecutively and fastened securely. The title page should include the article title, author(s) (given names, rather than initials are preferred), affiliation(s) and address(es),
